FLUOPTICS EDUCATION PROGRAM

**MASTERCLASS ON
FLUORESCENCE IMAGING FOR
SENTINEL LYMPH NODE SURGERY**

This intensive one-day workshop provides an opportunity to learn or further refine your skills in fluorescence imaging used for sentinel lymph node surgery. Small groups of surgeons will attend live surgeries to increase their knowledge of sentinel node detection by fluorescence with indocyanine green injection. These procedures will be performed with the FLUOBEAM® LM system, which is dedicated to sentinel lymph node and breast plastic and reconstructive surgery.

Attendees per session: **3 surgeons**

Sessions per year: **12 approximately**

SPEAKER

Docteur Charlotte NGÔ
Hôpitaux Privé des Peupliers -
France

Oncologist in gynecology and
senology

PROGRAM

Day before

- 17.30 pm - Meeting at the hotel
- 18.00 pm - Presentation of Fluoptics (clinical applications)

Day of the masterclass

- 8.30 am - Surgeries in the operating room with the expert surgeon
- 12.00 pm - Break
- 13.00 pm - Surgeries in the operating room with the expert surgeon
- 14.15 pm - Q&A
- 16.25 pm - Conclusion & feedback

**Indicative schedule*
