The most powerful parathyroid imaging solution
Fluorescence imaging, a disruptive technology
FLUOBEAM® LX IN ACTION

FLUOBEAM® LX allows surgeons to ensure optimized surgical practice and to work with more confidence.

Benefits

Work in ambient OR lights

- Accurate identification of parathyroid glands by autofluorescence

Optimized real-time display (high frame rate)

- Parathyroid glands perfusion assessment through indocyanine green injection

User-friendly (easy one-hand handling)

- Helps in the clinical decision-making process

Combined use of autofluorescence detection and perfusion assessment

- Autofluorescence detection reduces hypocalcemia rate after total thyroidectomy

FLUOBEAM® LX is a Class IIa device manufactures by Fluoptics© - CE N°0197.
Before the first use, user must read the medical instructions for use and its label.
